OUR COMMUNITIES

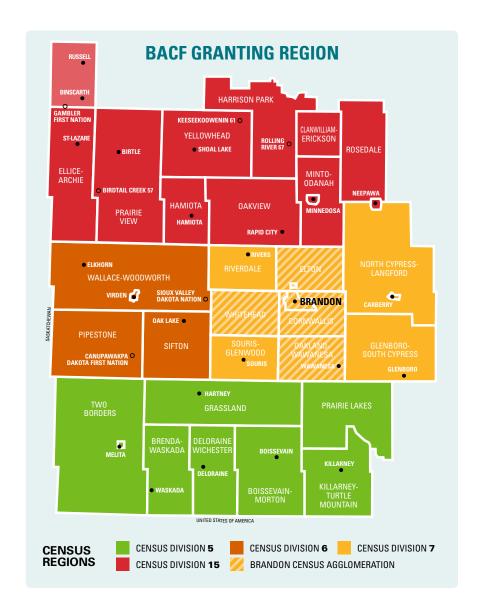

What is Vital Signs®?

OUR COMMUNITY SNAPSHOT

Preparing a Vital Signs report is an excellent way to begin to build our profile and role in our community.

In 2018, Brandon Area Community
Foundation (BACF) Board of Directors
made the decision to conduct our first Vital
Signs® community assessment report to
be launched in late 2019. This assessment,
based on the principles of Community
Foundations of Canada, measures a
number of indicators of community needs
and vitality in several areas.

The goal of our community check-up report is to identify the granting needs in Brandon and the area we serve. In developing this community resource, BACF will gain a better understanding of our granting regions. We want to understand our community's strengths and needs in order to work together and move forward. This Vital Signs® report will be used to help guide BACF's most important decisions, whether it's investing our grants in projects and charities that are on the front lines of community building or working with donors to develop funds that will make a difference, today and well into the future.
